

Louisiana Flood 2016

60,000+ Flooded Homes in 20 Parishes

30,000 People Rescued

13 People Dead

110,000+ People Displaced

Louisiana experienced nearly 36 inches of record-breaking rainfall between August 11th and August 15, 2016. The resulting flood has been a physical and economic disaster for Southern Louisiana. It has become known as the "thousand year flood" because many of the affected areas have historically never flooded. It is estimated that only about 25 percent of the homes and businesses affected were covered by flood insurance.

During the worst part of the storm, a skeleton staff at Guaranty Income Life continued to process new business, pay commissions and handle policyowner service calls. When power, television and cell services were lost, our sister company, Guaranty Media Ventures, continued broadcasting emergency information on their radio stations. *Today, we are fully staffed, and it is business as usual!*

We want to thank all of you who called and emailed your concern for our employees! The homes of eleven Guaranty employees were severely damaged and most of their possessions were destroyed.

We appreciate those of you who generously contributed to "The Guaranty Foundation," which is currently distributing cash donations to affected employees to help them with basic living necessities and more quickly rebuild their lives.
