

S&P 500® Dynamic Intraday TCA Index

Comparative Index Crediting Examples

The table below illustrates the historical performance of a single crediting strategy across multiple crediting rate scenarios. It provides insight into how the strategy would have performed in different market environments, including best and worst 10 year periods, as well as recent performance across shorter time horizons.

These examples are intended for context only. Current crediting rates and future results may vary.

Average Growth Rates							
Using a standardized 20-year year-end lookback period ending December 31, 2025							
Crediting Strategy	Crediting Rate Examples	Best 10 Years	Worst 10 Years	Last 10 Years	Last 5 Years	Last 3 Years	Last Year
S&P 500® Dynamic TCA – Annual Point-to-Point Cap	5.00%	3.98%	3.47%	3.96%	3.95%	4.95%	4.84%
	8.00%	6.15%	5.34%	6.04%	5.72%	6.94%	4.84%
	10.00%	7.53%	6.51%	7.41%	6.89%	8.25%	4.84%

How the S&P 500® Dynamic Intraday TCA Index Works:

- The index is linked to the S&P 500, while actively adjusting exposure throughout the day.

► It monitors market volatility and trading conditions in real time.

► When markets are calm, the index can keep more exposure to stocks.
- As markets become riskier, it automatically reduces exposure to help manage risk.

► These adjustments happen according to pre-set, rules-based formulas, not human judgment.

In simple terms: This index actively manages risk by adjusting exposure—scaling up in stable markets and dialing back during periods of higher volatility.

The S&P 500® Dynamic Intraday TCA Index (the "Index") is a product of S&P Dow Jones Indices LLC or its affiliates ("SPDJI") and has been licensed for use by Guaranty Income Life Insurance Company. S&P®, S&P 500®, US 500, The 500, iBoxx®, iTraxx® and CDX® are trademarks of S&P Global, Inc. or its affiliates ("S&P"); Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC ("Dow Jones") and these trademarks have been licensed for use by SPDJI and sublicensed for certain purposes by United Life Insurance Company. United Life Insurance Company's products are not sponsored, endorsed, sold or promoted by SPDJI, Dow Jones, S&P, or any of their respective affiliates. None of such parties make any representation regarding the advisability of investing in such product(s) nor do they have any liability for any errors, omissions, or interruptions of the Index.

S&P Multi-Asset Risk Control (MARC) 5% Index

Comparative Index Crediting Examples

The table below illustrates the historical performance of a single crediting strategy across multiple crediting rate scenarios. It provides insight into how the strategy would have performed in different market environments, including best and worst 10 year periods, as well as recent performance across shorter time horizons.

These examples are intended for context only. Current crediting rates and future results may vary.

Average Growth Rates							
Using a standardized 20-year year-end lookback period ending December 31, 2025							
Crediting Strategy	Crediting Rate Examples	Best 10 Years	Worst 10 Years	Last 10 Years	Last 5 Years	Last 3 Years	Last Year
S&P MARC 5% Index – Annual PTP Participation	100.00%	6.42%	4.29%	5.40%	3.48%	5.77%	10.30%
	125.00%	7.98%	5.33%	6.71%	4.33%	7.19%	12.88%
	150.00%	9.54%	6.36%	8.02%	5.17%	8.62%	15.45%

How the S&P MARC 5% Index Works:

- ▶ This index seeks to provide multi-asset diversification within a simple risk weighting framework.
- ▶ The three underlying component indices provide exposure to equities, commodities, and fixed income.
- ▶ The equity portion is linked to the S&P 500®, while the commodities component is linked to a gold index and the fixed income is based on Treasuries.
- ▶ The strategy is rebalanced with a cash component daily to maintain a target volatility of 5%.

In simple terms: the S&P MARC 5% was created in response to fluctuations in global markets and utilizes a multi-asset structure designed for consistency in both the client's short- and long-term outlook.

The S&P 500® Price Return Index and the S&P MARC 5% Excess Return Index (the "Indices") are products of S&P Dow Jones Indices LLC, a division of S&P Global, or its affiliates ("SPDJI") and have been licensed for use by Guaranty Income Life Insurance Company. Standard & Poor's® and S&P® are registered trademarks of Standard & Poor's Financial Services LLC, a division of S&P Global ("S&P"); Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC ("Dow Jones"). Guaranty Income Life Insurance Company's insurance products are not sponsored, endorsed, sold or promoted by SPDJI, Dow Jones, S&P, or their respective affiliates, and none of such parties make any representation regarding the advisability of investing in such product(s) nor do they have any liability for any errors, omissions, or interruptions of the Indices.

Citi Risk Balanced 5% Net Index

Comparative Index Crediting Examples

The table below illustrates the historical performance of a single crediting strategy across multiple crediting rate scenarios. It provides insight into how the strategy would have performed in different market environments, including best and worst 10 year periods, as well as recent performance across shorter time horizons.

These examples are intended for context only. Current crediting rates and future results may vary.

Average Growth Rates							
Using a standardized 20-year year-end lookback period ending December 31, 2025							
Crediting Strategy	Crediting Rate Examples	Best 10 Years	Worst 10 Years	Last 10 Years	Last 5 Years	Last 3 Years	Last Year
Citi Risk Balanced 5% Net Index – Annual PTP Participation	95%	5.47%	3.95%	4.73%	2.94%	4.95%	9.58%
	125%	7.16%	5.16%	6.19%	3.85%	6.50%	12.60%
	150%	8.56%	6.15%	7.39%	4.60%	7.78%	15.12%

How the Citi Risk Balanced 5% Index Index Works:

- ▶ This index tracks the hypothetical performance of a rules-based investment methodology.
- ▶ The four components of the investment methodology are equities, commodities, Treasuries and cash.
- ▶ In volatile markets, the index allocates part of its exposure to the cash allocation through an intraday risk-control mechanism.
- ▶ The index is designed to maintain a 5% volatility target.

In simple terms: the Citi Risk Balanced 5% Index provides an alternative to other volatility control strategies with underlying components managed by Citi designed to reflect industry benchmarks.

S&P 500® Index

Comparative Index Crediting Examples

The table below illustrates the historical performance of two crediting strategies across multiple crediting rate scenarios. It provides insight into how the strategies would have performed in different market environments, including best and worst 10 year periods, as well as recent performance across shorter time horizons.

These examples are intended for context only. Current crediting rates and future results may vary.

Average Growth Rates							
Using a standardized 20-year year-end lookback period ending December 31, 2025							
Crediting Strategy	Crediting Rate Examples	Best 10 Years	Worst 10 Years	Last 10 Years	Last 5 Years	Last 3 Years	Last Year
S&P 500® Index Point-to-Point Cap	6%	4.77%	4.09%	4.77%	4.77%	6.00%	6.00%
	9%	7.14%	5.85%	7.14%	7.14%	9.00%	9.00%
S&P 500® Index Point-to-Point Participation Rate	40.00%	6.01%	4.06%	6.48%	7.13%	8.45%	6.46%
	25.00%	3.83%	2.59%	4.13%	4.54%	5.36%	4.10%

How The S&P 500 Price Return Index Works

- Widely regarded as the best single gauge of large-cap U.S. equities, this index is comprised of the 500 leading companies in the stock market.

► The index price is based on the performance of the stocks associated with the 500 companies that comprise the index.
- Every day, the index compares its opening price to its closing price. If the opening price is higher than the closing price, the index loses value. If the closing price is higher than the opening price, the index gains value.

► The value of this version of the S&P 500 index does not include dividends in the return.

In simple terms: the S&P 500 remains one of the most well-known financial benchmarks. It has an easy-to-grasp structure, accessible performance tracking, and features iconic brands that many people know and utilize in their everyday lives.

The S&P 500® Price Return Index (the "Index") is a product of S&P Dow Jones Indices LLC or its affiliates ("SPDJI") and has been licensed for use by Guaranty Income Life Insurance Company. S&P®, S&P 500®, US 500, The 500, iBoxx®, iTraxx® and CDX® are trademarks of S&P Global, Inc. or its affiliates ("S&P"); Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC ("Dow Jones") and these trademarks have been licensed for use by SPDJI and sublicensed for certain purposes by Guaranty Income Life Insurance Company. Guaranty Income Life Insurance Company's products are not sponsored, endorsed, sold or promoted by SPDJI, Dow Jones, S&P, or any of their respective affiliates. None of such parties make any representation regarding the advisability of investing in such product(s) nor do they have any liability for any errors, omissions, or interruptions of the Index.

Indexed Crediting Strategies Performance Projections

It is important to consult with a financial professional when diversifying across crediting strategies that could align with financial goals, risk tolerance levels, and time horizons.

Indices that do not have at least 10 years of actual performance history cannot be illustrated in all states. All information for an index prior to its Launch Date is hypothetical back-tested, not actual performance, and based on the index methodology in effect on the Launch Date. Back-testing is a method of demonstrating how an index may have performed in the past based on how it has performed recently. It is used to produce hypothetical results for a specific period when results are otherwise unknown or not available. Back-tested performance reflects application of an index methodology and selection of index constituents with the benefit of hindsight and knowledge of factors that may have positively affected its performance, cannot account for all financial risk that may affect results and may be considered to reflect survivor/look ahead bias.

The calculations used assume static crediting rates and do not include a bonus or withdrawals. Non-guaranteed cap and par rates may change each contract year and may create better or worse performance than shown here. The range of crediting rates shown above may be different than current crediting rates. This flyer is updated on an annual basis. Refer to the Interest Rate Bulletin for current rates and to the Crediting Options Guide for more details about each index.

Fixed Indexed Annuities are not stock market investments and do not directly participate in any stock or equity investments. An annuity may not increase in value, depending on the interest crediting accounts you select.

Not FDIC/NCUA insured • Withdrawal charges may apply • Not bank/CU guaranteed • Not a deposit • Not insured by any federal agency • May go down in value
