

Understanding Premium Allocation Options

When you choose a WealthChoice fixed indexed annuity (FIA), you may select from attractive options to help meet your retirement savings goals. Although FIA premiums are not a direct investment in the market, the credited interest is based on the performance of the selected indexes. WealthChoice also offers a fixed interest option. You may allocate premiums to any combination of interest crediting strategies and reallocate them each contract anniversary.

A crediting method tracks performance over the crediting period, calculating interest based on index performance. This includes elements like caps and participation rates that may affect your interest. Positive market results accrue indexed interest, while negative results do not impact your FIA's value.

Interest Crediting Options

Fixed Account

The fixed account is set by the issuing company. The fixed rate is declared each contract anniversary and guaranteed for one year. Interest is credited daily.

S&P 500® Price Return Index

The S&P 500® is widely regarded as the best single gauge of large-cap U.S. equities. The index includes 500 leading companies and covers approximately 80% of available market capitalization. For more information visit: <https://www.spglobal.com/spdji/en/indices/equity/sp-500/#overview>.

WealthChoice offers the following crediting options based on this popular index:

► Annual Point-to-Point Bailout Cap

Index growth is calculated from one contract anniversary to the next. If index growth is positive, the policyholder receives the lesser of the index growth and the cap rate. If the next declared cap rate for this crediting strategy falls below the bailout rate during the surrender charge period, the surrender charges and Market Value Adjustment are waived for the total Account Value for a 30-day window.

► Annual Point-to-Point Participation

Index growth is calculated from one contract anniversary to the next. If index growth is positive, it is multiplied by a Participation % to determine the indexed interest to be credited on the contract anniversary.

► Annual Point-to-Point Trigger

A declared interest Trigger Percentage is set at the start of each index term and credited to the Account Value if the index return is greater than or equal to the Trigger Threshold. If the index performance is negative, then no interest is credited.

► Monthly Sum Cap

The return is based on the sum of 12 monthly Index change percentages each contract year. Each monthly Index change percentage cannot exceed the Monthly Change % Cap. Negative monthly changes have no downside limit and can reduce the Indexed Interest Credit for the index term period.

► Barclays Global Quality Index Annual Point-to-Point Participation

The Barclays Global Quality Index is managed by Barclays Bank PLC, featuring quality stocks, global bonds and commodities to seek returns while targeting a specific desired level of risk. Index growth is calculated from one contract anniversary to the next. If index growth is positive, it is multiplied by a Participation % that is credited on the contract anniversary. The initial Guaranteed Minimum Indexed Interest Participation Percentage rate set at issue for the Barclays Global Quality Index applies for the entire surrender charge period. The initial rate and any renewal rates during the surrender charge period will equal or exceed this Initial Guaranteed Minimum Rate. For additional information visit:

<https://indices.cib.barclays/IM/33/en/indices/static/globalquality.app>

► The S&P 500® Dynamic Intraday TCA Index Annual Point-to-Point Cap

This index is designed to measure exposure to the S&P 500 while applying a trend-following mechanism and intraday volatility control. It uses 13 observation windows throughout the trading day to adapt to changing market conditions as it seeks a more stable volatility experience compared to traditional risk-control indexes. The initial Guaranteed Minimum Indexed Cap set at issue for this Index applies for the entire surrender charge period. The initial rate and any renewal rates during the surrender charge period will equal or exceed this Initial Guaranteed Minimum Rate. For more information visit:

► Horizon Ascend 5%™ Index Annual Point-to-Point Participation

The Horizon Ascend 5%™ Index is managed by Horizon Investments, utilizing institutional and academic quality investment techniques to smooth returns under any market condition. Index growth is calculated from one contract anniversary to the next. If index growth is positive, it is multiplied by a Participation % to determine the indexed interest to be credited on the contract anniversary. For additional information visit:
